

# EPI

## Integrated Engineering Consultancy & Construction Service Provider

Accepted in the year 1970, EPI is one of the industry leading organizations, under the aegis of Ministry of Heavy Industries & Public Enterprises engaged in undertaking turnkey projects and consultancy services in India and abroad. As on 31.03.2012, there were 16 central public sector enterprises in the Industrial Development & Technical Consultancy Services group, amongst which EPI during the last 40 years, is engaged in the field of execution of large and multi-disciplinary industrial & construction projects on the turnkey basis and project consultancy services. EPI's comprehensive range of services also encompass in the area of Civil & Structural Works, Coal & Material Handling Systems, Roads & Highways and many more. EPI is pioneer in providing integrated services from concept to commissioning by rendering the services such as feasibility studies & detailed project reports, project construction, design & engineering, erection & commissioning, operation and maintenance etc.

### EPI's Role as Technical Consultancy Services Provider

- EPI is an integrated engineering project management consultancy and construction company, having self-reliance of handling wide range of projects

and turnkey execution capabilities in major areas of operation.

- A team of competent professional well equipped and trained for in-house designing, engineering and project management capabilities are carrying out a number of activities using latest design & analytic software, relating to assignments in steel

sectors, oil & gas units, power & infrastructure.

- This team has both commercial and public sector management backgrounds as well as a wealth of experience in specialised public sector issues. EPI is making continuous efforts to constantly upgrade technology and looking into the aspects of consulting appropriate designing and value engineering.

- EPI has prepared pre-feasibility reports and DPRs for Monorail Projects/ Structural Retrofitting and Low Cost Housing areas.

- The company has gained substantial experience and recognition in some of these sectors and had built a strong portfolio of services to meet the growing demand of clients with latest techniques & technologies. This

development has helped the company in adjusting to the sectoral market fluctuations by aligning itself towards sectors having higher opportunities in future.

- EPI's team of experts in technical consultancy services is delivering support and advice to all the clients within the public sector group. While providing consultancy, EPI reviews the design and drawings for various projects and provide engineering solution, including standardization of design data to help in marketing efforts and conceptualization of new projects with technical backup in alignment design, geo-

technical analysis, etc.

### Vision

- The ever increasing pressure on the provision of public services, with the focus on service delivery and the need for financial discipline had made the use of our expert in-house team increasingly valuable.
- New policies and initiatives are continually being introduced in the company placing a premium on the ability to respond innovatively and quickly in order to deliver value-for money services.
- EPI's experience of working across a wide range of public

sector organisations enables it to offer the support necessary to achieve the objectives of providing complete basic engineering, detailed engineering, designer's supervision, inspection, assistance during commissioning and other general services for green-field projects.

It is pertinent to highlight that EPI is now marching ahead with its goal of becoming premier technological consultancy organisation engaged in rendering engineering, technical and educational consultancy services for construction of all types of projects, plants, installation, certification, etc.
